

Job Offer

The company BMK Group develops and produces electronic boards and devices. It was founded in 1994 in Augsburg, Germany. In 2015 company has opened its new plant in Krupka, which is engaged in the production of custom electronics.

For our plant in Krupka we're looking for:

EA (Electronic Assembly) Technician

Job description

The EA Technician will be responsible for operation, setup, troubleshoot and maintain equipment used in EA related machines.

He/She has to:

- Support and train EA operators on machine operation
- Setup and changeover solder wave, selective solder machine, hot bar soldering for different products
- Maintain and repair the equipment and troubleshoot in running production
- Ensure proper program performance and efficiency
- Calibration of all equipment

Requirements:

- Technical Skills – machinery experience in production (2 years minimum)
- Experience with any or all of the above mentioned equipment
- Strong mechanical and electrical troubleshooting skills

- Proficient in reading and verifying electrical, pneumatic and mechanical schematics/drawings
- Must be organized, detail oriented and capable of multitasking
- Able to work under minimal supervision
- Understanding of solder processes, the critical process parameters and their influence on production quality
- Must be safety oriented in the proper use of hand and power tools and with an understanding of energy isolation and safety precautions on all equipment
- Language: Minimum: good knowledge of English, preferably understanding German.

Soft Skills:

Most important is a strong mindset of „keep the things running“ and „do whatever is necessary to get production run again“ paired with a high quality awareness. He/She also has to have the ability to motivate the operators and to assure high productivity and quality, which is mainly influenced by the operators.
